Continuation of Disposition of Claims: Claims pending in the application are 79-98, 100-109, 111-114, 116-122, 127, 131, 134, 136-138, 144, 149 and 156-170.

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 79-98, 100-109, 111-114, 116-122, 127, 131, 134, 136-137, 149, 156 and 159-169, drawn to a portable mobile communication and information apparatus in a housing of handheld size and weight, the apparatus comprising a cell phone (or a satellite phone) in the housing being adapted to communicate with remotely devices, wherein the cell phone is adapted for storing sound, moving images and combined sound and moving images to its memory and for reproducing the sound, moving images and combined sound and moving images from the memory to wireless external devices, classified in class 455, subclass 556.1.
  - II. Claims 138 and 144, drawn to a specified housing structure of a small replaceable flash memory card and its socket of an electronic device, classified in class 439, subclass 347.
  - III. Claims 157-158 and 170, drawn to a digital camera for capturing still or moving images, wherein the digital camera having a replaceable flash memory card for storing data captured by its camera or microphone and wherein the digital camera being configured to reproduce the stored data to wired connected external device, classified in class 348, subclass 207.1
2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [III] has separate utility such as a specified housing structure of a small replaceable flash memory card and its socket of an electronic device. See MPEP § 806.05(d).
4. Inventions [I] and [III] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [II] has separate utility such as a cell phone (or a satellite phone) **in the housing** being adapted to communicate with remotely devices, wherein the cell phone is adapted for storing sound, moving images and combined sound and moving images to its memory and for reproducing the sound, moving images and combined sound and moving images from the memory to **wireless external devices**. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.
